

- authors: include projects, names of members and contact persons
- document changes across versions with reference and date → 'document history'
- introduction: not only first workshop → Update
- numbering of subsections (e.g. 3.2) → issue of google doc?
- Stakeholders: Boss of bee drivers ^{change} community
- personas: add pictures
- ASIS_O2: * missing: bee driver being informed
* missing time constraints
- delete product philosophy → find a better point where to mention philosophy (interaction or to be SF)
- To-be-Scenario: * Traceability matrix for all groups together
* include IDs and names on references
* ease 'refinement in system functions'
- System Functions: * not two SF for request and send → one SF for request and send (get) together
- Interaction Cases: * include references to screens in screen arrangement
* add references to SFs, see example IC-C1
- traceability for all groups: SF clients → SF series and IC → SF
